

Revitalize. Rededicate. Renew.

Business is changing. As the nature of global commerce evolves, diverse constituencies – from municipalities to corporations to consumers – are recognizing the need to identify innovative sources for sustainable power. They're focused on developing targeted strategies that harness the potential of our natural environment. And they're dedicated to investing in next generation technologies capable of revitalizing our planet and renewing our commitment to a smart energy future.

A Step Ahead

At Synagro, helping customers strike a balance between short-term value and long-term vision is both a passion and a professional promise. We do it by engineering products and services that emphasize Renewable Energy as the cornerstone of any essential environmental solution. We're proud of our heritage and experience converting the natural waste challenges created from civic and commercial progress into beneficial new Renewable Energy sources.

Our expertise covers a broad range of applications:

- Biosolids drying to create renewable fuel
- Utilization of anaerobic digester gas
- F.O.G. (fats, oils and greases) utilization to displace fossil fuels
- Syngas (synthetic gas) and biogenic fuel production from biomass/biosolid gasification for power generation
- Industrial waste heat recovery and utilization
- Landfill gas recovery and utilization
- Combined heat and power (cogeneration) systems for high efficiency power generation and heat recovery
- Biomass fuel sourcing

RENEW YOUR KNOWLEDGE

Every year Synagro provides

30,000

tons of renewable biosolid fuel pellets which offsets

10,000

tons of coal fossil fuels

More than half of U.S. states have adopted Renewable Portfolio Standard (RPS) programs, mandating renewable energy quotas in the power industry and creating incentives within the commercial, industrial and residential sectors.

Let Synagro help you meet – and exceed – your RPS expectations, ensuring compliance and keeping you a step ahead for decades to come.

The Synagro Advantage

Renewable Energy is a rapidly evolving territory, and Synagro is the guide you need for transforming existing natural waste challenges into sustainable power resources. Our unequaled experience using proven technologies distinguish us as leaders in the green energy market intent on fostering:

- Production of low-cost renewable energy
- Economic, environmental and social sustainability
- Improved energy efficiency
- Decreased dependence on foreign oil
- Environmental stewardship
- Reduction in carbon footprint

You have challenges. Synagro has energy solutions. Let us assist you in making Renewable Energy a vital part of converting waste challenges into new sustainable resources. As people continue to grow and thrive, we have to synchronize the impact communities and industry have on the environment. We have to transform challenges into renewable solutions.

1,500

homes can be lit by
electricity generated
from Synagro's biosolid
transforming process in
Woonsocket, Rhode Island

 = 100 Homes

Our Facilities Based Solutions Include:

- Complete project financing
- Appropriate technology selection
- Design build services
- Expert operations and maintenance
- Facility permitting
- Access to tax credits and grant money
- Highest standards of environmental, safety and health compliance

More good news?
Biosolid energy =
100% renewable.

Welcome to Synagro

Constant, dynamic change: at Synagro, we harness the power of proven technologies to create sustainable solutions to the natural waste challenges generated by civic and commercial growth.

By synchronizing growth with responsible environmental stewardship, our integrated services empower key stakeholders to advance their mission and achieve their goals.

Welcome to Synagro, where the pursuit of synchronization helps people and the planet thrive.

We're ready to serve you. Contact us to learn more.

What We Do

Synagro works with commercial and community partners to design and execute smart, efficient and integrated waste treatment and conversion solutions. Our extraordinary team of technical and regulatory experts leads the field in pioneering systems that redirect the byproducts of civic and industrial growth into compelling new modes for achieving sustainable balance.

Working With You

At Synagro, our watchwords are "maximizing value" – for our customers, their communities and the wider world around them. And we put our money where our mouth is, offering incomparable products and services born of hard-won experience and the expertise that goes along with it.
