Synagro to Highlight Products and Services at 2018 Florida Water Resources Conference

Company Will Sponsor University of South Florida Student in the 2018 Florida Water Environment Student Design Competition

BALTIMORE, Maryland, April 10, 2018 – [Synagro Technologies, Inc.](http://www.synagro.com), one of the largest private composters in the United States, is pleased to announce its participation in the 2018 Florida Water Resources Conference (FWRC), in Daytona Beach, Florida, April 15 to 18, 2018, at the Ocean Center Exhibit Hall.

Join us inside the Ocean Center at Booth Number 623 to learn about the many ways Synagro can assist you with biosolids and organic feedstocks management. From thermal drying and energy generation to digester cleaning, when it comes to biosolids, our mission is to be the most trusted provider of resource recovery solutions. We help our customers identify their needs and the solutions that are best tailored to most economically address those needs.

“We are pleased to be exhibiting at 2018 FWRC in Daytona Beach, and to be showcasing all of our products and services,” announced Michael Wolfe, business development manager, Synagro. “We’re equally excited to join in sponsoring an exceptional University of South Florida (USF) student in the 2018 Florida Water Environment Student Design Competition.”

“The USF project that we are sponsoring is based on work undertaken by students at the Pinellas County South Cross Bayou Facility where we have a biosolids drying facility,” said Matt Busch, plant manager, St. Petersburg, Synagro. “The projects that these student teams are working on include side stream centrate phosphorus removal to reduce alum consumption; denitrification improvements – investigating alternative denitrification technologies; and methods and process improvements to increase bio-gas production.”

About Synagro

Founded in 1986, Synagro Technologies, Inc. provides environmentally sustainable solutions for commercial and municipal organizations that generate organic by-products. Synagro consistently transforms industrial and municipal waste into environmentally friendly resources that benefit our communities. As the largest recycler of organic by-products in North America, Synagro uses best-in-class processes, from beneficial reuse to renewable energy, that adhere to the strictest of environmental regulations to provide compelling solutions for communities across the continent. Serving more than 600 municipal and industrial water and wastewater facilities in the United States and Canada, Synagro’s

leading systems of organic by-product management services support municipalities of all sizes in saving money and meeting environmental regulations. Visit synagro.com to learn more.
