## **Synagro to Highlight Products and Services at 2019 Florida Water Resources Conference**

### **Company to Open Its Doors as Part of South Cross Bayou Advanced Water Reclamation Facility Tour**

**BALTIMORE, Maryland, April 9, 2019** – [Synagro Technologies, Inc.](http://www.synagro.com), one of the largest private composters in the United States, is pleased to announce its participation in the 2019 Florida Water Resources Conference (FWRC), in Tampa, Florida, April 14 to 17, 2019, at the Tampa Bay Convention Center.

Join us inside the Convention Center at Booth 848 to learn about the many ways Synagro can assist you with biosolids and organic feedstocks management. From thermal drying and energy generation to digester cleaning, when it comes to biosolids, our mission is to be the most trusted provider of resource recovery solutions. We help our customers identify their needs and the solutions that are best tailored to most economically address those needs.

“We are pleased to be exhibiting at 2019 FWRC in Tampa, and to be showcasing all of our products and services,” announced Michael Wolfe, business development manager, Synagro. “We’re equally excited to open our doors as part of the tour of the South Cross Bayou Advanced Water Reclamation Facility (AWRF).”

“As partners in the South Cross Bayou AWRF, the largest wastewater treatment facility in Pinellas County, we are proud to manage pelletizing as well as the marketing and distribution of the finished product,” said Pam Racey, vice president, Project Development, Synagro. “Annually we process more than 6,000 tons of fertilizer through pelletization from nearly 100-percent of recycling of biosolids at both of the county plants – South Cross Bayou AWRF and the William E. Dunn Water Reclamation Facility.”

### **About Synagro**

Founded in 1986, Synagro Technologies, Inc. provides environmentally sustainable solutions for commercial and municipal organizations that generate organic by-products. Synagro consistently transforms industrial and municipal waste into environmentally friendly resources that benefit our communities. As the largest recycler of organic by-products in North America, Synagro uses best-in-class processes, from beneficial reuse to renewable energy, that adhere to the strictest of environmental

regulations to provide compelling solutions for communities across the continent. Serving more than 600 municipal and industrial water and wastewater facilities in the United States and Canada, Synagro's leading systems of organic by-product management services support municipalities of all sizes in saving money and meeting environmental regulations.
