Synagro Awarded 10-Year Contract by City of Austin, Texas for Biosolids Removal and Processing

Austin, Texas has entered into a contract to have Synagro manage biosolids composting for the next ten years

BALTIMORE, Maryland, November 27, 2018 – [Synagro](#), the preeminent provider of biosolids and residuals solutions services in North America, has been awarded an up-to-10-year contract for biosolids composting by the city of Austin, Texas, effective November 1, 2018.

"Synagro has managed Austin's biosolids responsibly since 2008, so we are very pleased to have been selected for this new project," said Andrew Bosinger, vice president, strategic accounts, Synagro. "This contract will enable the City to move to a 100-percent composting solution with Synagro responsible for production of the iconic Dillo Dirt* compost historically produced by the city."

In addition to Dillo Dirt compost, Synagro will produce and market All Gro™ compost, its own brand of high-quality finished compost and will invest in expanding the market for compost in the Austin area. The city of Austin will save at least \$1.0 million per year by entering this public-private partnership with Synagro.

"Synagro is proud of its performance record with Austin," said Pam Racey, vice president of project development, Synagro. "We look forward to continuing to work with and for the city as together we strive for a cleaner, greener world."

About Synagro

Founded in 1986, Synagro Technologies, Inc. provides environmentally sustainable solutions for commercial and municipal organizations that generate organic by-products. Synagro consistently transforms industrial and municipal waste into environmentally friendly resources that benefit our communities. As the largest recycler of organic by-products in North America, Synagro uses best-in-class processes, from beneficial reuse to renewable energy, that adhere to the strictest of environmental regulations to provide compelling solutions for communities across the continent. Serving more than 600 municipal and industrial water and wastewater facilities in the United States and Canada, Synagro's leading systems of organic by-product management services support municipalities of all sizes in saving money and meeting environmental regulations.
