

TURNKEY™ EMERGENCY BIOSOLIDS HANDLING SERVICES FOR
**COMPROMISED EQUIPMENT AND
PLANTS AND NATURAL DISASTERS**

REGIONAL EXPERTISE

Be it thunderstorms and tornadoes in the Central states or hurricanes and tropical storms in Florida like Ian and Sandy, or compromised plants or equipment, Synagro is prepared to act quickly and efficiently.

Developed by serving our customers during unique emergencies for more than 35 years, Synagro's full suite of services and streamlined process can help you sustain your operations with expert support tailored to your region when and where you need it.

For example, we realize in the Pacific Northwest, many facilities have equipment that is nearing or at its end-of-service life and when it fails, Synagro is at the ready.

In the Eastern U.S., we've supported multiple customers when their plants have been compromised with temporary dewatering, emergency pumping and tank cleaning, and hauling and disposal when new on-order equipment is delayed.

800-370-0035
Option I

Synagro has more than 35 years of experience helping customers manage compromised equipment and facilities and the results of natural disasters through a broad service offering collectively referred to as our

TurnKey™ emergency biosolids handling services – our full-service, turn-key solution for municipalities and businesses throughout the continental United States.

Drawing on significant industry experience responding to customers' emergencies, we've packaged those services typically employed as our TurnKey emergency biosolids handling services including, but not limited to:

- Regionally and seasonally based and turnkey in most cases;
- Emergency digester and tank pumping and cleanup;
- Emergency liquids or solids hauling and disposal;
- Advance- or post-event temporary mobile dewatering (trailer-mounted belt filter presses or mobile centrifuge units);
- Lagoon and pond dredging;
- Land application; and
- Lagoon storage.

QUICK RESPONSE.AVAILABLE RESOURCES.

When disaster strikes, you need to focus on sustaining your operation – not searching for equipment or expertise. At Synagro, we address all of the needs posed by equipment and facilities failures and natural disasters and we do it with the sense of urgency required.

Internally, our emergency biosolids handling services process has been streamlined to ensure the quickest possible response from proposal to having equipment onsite and boots on the ground.

Nationwide, a growing number of municipalities and businesses consider Synagro to be their contingency plan in case of such emergencies.

Partnering with Synagro will also help enhance your credentials as a socially responsible organization concerned with both the economic and environmental bottom line.

SYNAGRO ADVANTAGE

When you are looking for the best biosolids and residuals solutions to serve your business and your community, Synagro has the proven solutions to help you succeed. Municipalities and industrial organizations like yours that want to make the best use of organic waste turn to Synagro. Across the United States, Synagro applies expertise and innovative technology to provide resource recovery solutions that meet the unique needs of customers and communities.

WHO WE ARE

Founded in 1986, Synagro Technologies, Inc. works to turn waste into worth by helping more than 1,000 municipal and industrial water and wastewater facilities in North America move toward safer, cleaner and more environmentally beneficial practices. For some, it's simply cleaning the water supply. For others, it's much more – we partner with them to process their waste for compost or energy pellets, creating healthy soil and sequestering carbon in the process. As the largest recycler of organic by-products in North America, we're trusted because we remove risks while keeping the logistics clean. Because our expertise is the oldest in the business, we can offer tailored solutions that ensure no waste goes to waste. Much of our work isn't pretty. But a greener world emerging from a cleaner one – worth coming from waste – and we think that's pretty beautiful. Visit www.synagro.com to learn more.

HOW WE CAN HELP

Our professional and experienced staff members provide solutions for all aspects of biosolids and residuals management needs, from land permitting and soil analysis by our nationwide technical services team to facilities development by our in-house engineering staff. Synagro provides a comprehensive scope of customer focused solutions.
