## **Synagro Offers TurnKey™ Emergency Biosolids Handling Services for Compromised Plants and Natural Disasters**

*Be it thunderstorms and tornadoes in the Central states or hurricanes and tropical storms in Florida like Ian and Sandy, or compromised plants and equipment, Synagro is prepared to act quickly and efficiently.*

**BALTIMORE, Maryland, May 23, 2023** – [Synagro Technologies, Inc.](#), the preeminent provider of biosolids and residuals solutions services in North America, today announced the launch of its TurnKey™ emergency services – a full-service, turn-key solution for municipalities and businesses throughout the continental United States.

“By serving our customers during unique emergencies for more than 35 years, we’ve developed a broad service offering collectively referred to as our TurnKey emergency services and a streamlined process to help sustain businesses with expert support tailored regionally for when and where needed,” explained Pam Racey, chief commercial officer, Synagro. “For example, we realize in the Pacific Northwest, many facilities have equipment nearing or at its end-of-service life and when it fails, Synagro is at the ready.”

“Synagro has more than 35 years of experience helping customers manage compromised equipment and facilities and the results of natural disasters,” added Michael Kotelec, senior vice president, Services Sales, Synagro. “In the Eastern U.S., we’ve supported multiple customers when their plants have been compromised with temporary dewatering, emergency pumping and tank cleaning, and hauling and disposal when new on-order equipment is delayed.”

Drawing on this significant industry experience responding to customers' emergencies, Synagro has bundled those services typically employed including, but not limited to:

- Regionally and seasonally based and turnkey in most cases;
- Emergency digester and tank pumping and cleanout;
- Emergency liquids or solids hauling and disposal;
- Advance- or post-event temporary mobile dewatering (trailer-mounted belt filter presses or mobile centrifuge units);
- Lagoon and pond dredging;
- Land application; and
- Lagoon storage.

For more information, please contact your local Synagro sales representative, call us at 1-800-370-0035, Option 1, or visit <http://www.synagro.com/turnkey>.

## About Synagro

Founded in 1986, Synagro Technologies, Inc. works to turn waste into worth by helping more than 1,000 municipal, industrial water and wastewater facilities, and agricultural partners in North America move toward safer, cleaner and more environmentally beneficial practices. For some, it's simply cleaning the water supply. For others, it's much more – we partner with them to process their waste for compost or energy pellets, creating healthy soil and sequestering carbon in the process. As the largest recycler of organic by-products in North America, we're trusted because we remove risks while keeping the logistics clean. Because we have the most experienced team in the industry, we can offer tailored solutions that ensure no waste goes to waste. Much of our work isn't pretty. But it's a greener world emerging from a cleaner one – worth coming from waste – and we think that's pretty beautiful. Visit [www.synagro.com](http://www.synagro.com) to learn more.
